PROJECTS

Online Examnation System (Full Stack Project) Developed a secure, full-stack Online Examination System using PHP 8.2, MySQL, HTML, CSS, JavaScript, and Bootstrap, featuring role-based access for Admin, Teacher, and Student users. The system supports section-wise timed exams with MCQ and descriptive questions, automatic answer saving, fullscreen enforcement, and browser violation detection to ensure exam integrity. (ReadMore)

Bizcell Clone (Responsive HTML/CSS) Created a responsive business landing page clone using HTML and CSS, focusing on layout, styling, and modern UI design. (Live Demo)

Kbiz Clone (HTML/CSS). Created a static clone of a modern business website using HTML, CSS, Bootstrap 5, and JavaScript, focusing on little responsive layout, clean UI design, and structured page sections. (Live Demo)
